**LA S13 2 Day British Columbia Sturgeon Fishing Trip for Two Anglers  
Greg Brownlee • Neil and Brownlee**

Neil and Brownlee work with a globally-recognized outfitter that not only continues to catch the largest White Sturgeon on the planet, but also spearheads conservation initiatives and programs for the Fraser River Sturgeon Conservation Society (2015 Contributing Volunteer of the Year). Fisherman travel from all corners of the globe to fish the Fraser River with our outfitter. Our outfitter guarantees a catch for every boat, at any point in the year, providing every client the opportunity to put their hands on not only the largest freshwater species in the world, but one of the oldest (surviving three ice ages). You'll get to participate in the Sturgeon Tagging Program, which helps preserve the Sturgeon and gain insight into the world's best Sturgeon Fishery. Conveniently located just 1.5-hours outside of Vancouver (east), the Fraser River holds an estimated 60,000 White Sturgeon. These Sturgeon can live over 150 years and are incredibly large "fish." Conservatively, you can easily expect to catch a Sturgeon longer than you are tall on this trip (over 6'). Most Sturgeon at 6' in length will weigh 200 lbs. What makes catching these dinosaurs so exciting is the fight itself. You may expect that since these fish are so long and heavy, they wouldn't put up much of a fight. It's quite the opposite, in fact. Every Sturgeon that is caught is measured, tagged or checked for existing tag. You will get in the water (wearing waders provided by our outfitter) to do such with every Sturgeon over 5' in length. Various types of baits are used to catch Sturgeon, but the method stays consistent by dropping bait at the bottom of the river and waiting for a bite. The Sturgeon has little to no eyesight; therefore, they rely on their sense of smell to find the bait. This outfitter knows where these dinosaurs are! Many of the guides have been fishing on the river for over 15 years! Does not include meals, lodging, or license/tag. **Minnesota SCI would like to thank Greg Brownlee for this 100% donation!**

Aoudad Sheep hunting can be a Very Tough, and an extremely physical hunt, yet rewarding adventure. Our goal here at HWO is to give you the trophy and hunt of a lifetime. When hunting free range aoudad in West Texas we have access to multiple different private ranches with acreage totaling over 400,000 acres of sheep paradise! When you book a hunt, we will discuss the options each ranch has to offer to fit your personal needs. Each ranch boasts a large population of aoudad, with equal trophy opportunity. Properties we hunt are all located in the High Desert of the Trans-Pecos region in West Texas. We are scattered from Van Horn to Marathon. For traveling, the nearest commercial airports will be El Paso or Midland (Depending on the ranch we hunt). Once landed, you will rent a car, or we will arrange pick up for \$250. You will then travel 100-200 miles out of El Paso or Midland to the ranch we are hunting. **LA S15 9 Day Alberta Whitetail Deer and Moose Combo Hunt for One Hunter**  
***Rob Brown • Timber King***

On our November moose hunts you can expect to be on a quad or in a truck with your guide alongside for the entire hunt, this is a spot and stalk hunt, hunting either field or pasture or back off the farmland in the willow swamps these moose call home. Hunt dates are November 21-29 2019. The moose in November will not be calling and are most likely be in bachelor groups, increasing the chances of seeing multiple bulls in one area. We hunt Whitetail deer in the Northeastern corner of Alberta, Canada. Where the rolling grain fields meet the forest fringe, creating some the best ground for our deer and moose to produce large amounts of antler. The 5,200 square miles our area encompasses consists of 90% private land and 10% government land. Resident pressure is minimal in our area and very limited on moose as Alberta residents must draw a license before they are able to hunt one. When hunting for whitetail you can expect to be in a heated blind or stand. We like to utilize what's best for the spot, sometimes being lock-on stands or ladder stands. But for the most part it will be in a comfortable tower stand or blind. Approximately 75% of our whitetail hunting is done from the blind while the other 25% consists of glassing fields from the pickup truck then stalking in for the shot, both ways have proven successful.

**LA S54 "African Menagerie A Celebration of Life" Leather Bound Book with an Original Etching  
Brian Jarvi • Jarvi Studio**

This handsome, leather-bound volume comes with a signed etching by Brian and is suitable for framing as its own piece of collectible fine art. Limited to editions of just 90 and featuring one of the iconic Big Five—elephant, lion, Cape Buffalo, rhino or leopard—each traditional etching is hand pulled. Let us know which species you prefer and how you would like the book personally signed. A wildlife art painting unprecedented in history, Jarvi's epic masterwork features 208 different species and is the subject of a brand new book from international publisher Rizzoli and a national museum tour. From its very conception seventeen years ago, "An African Menagerie" has experienced a journey of growth, meaning, and evolution. Now, it has entered the most exciting phase; creation of the epic vision. The seven paneled twenty-seven foot long work will feature more than one hundred forty different species from the Dark Continent, spawned from early childhood fascination with both living collections of wild animals, and paintings from the distant past portraying large varied groups of exotic creatures. In the "Menagerie," the gathering of an incredible array of wildlife will be set against a grand panoramic backdrop, highlighted by a view of the receding snows of Mount Kilimanjaro. All of Africa's icons including the Elephant, Leopard, Giraffe, Rhino, Hippo, and Zebra will mingle with such exotics as the Bongo, Okapie, and Mandrill. More than eighty bird species; Ostrich, Shoebill, Lilac Breasted Roller, and Sacred Ibis among them, have also arrived. And man, who has come to dominate the earth, has been summoned to this gathering, as the natural world seeks answers to the growing issues of survival faced by countless species across the planet. Allegorical storyline's intended to dramatize the urgency of the moment are woven into the tapestry of this idyllic scene. For example, the arrival of the "Four Horses" from the far left, and the "Lion and the Lamb" seated directly in front of a "DaVinci" like figure in the foreground, compel the viewer to interact with the scene. Over the years, the original concept of simply seeking to create art, has evolved into something far more meaningful: a message to humanity intended to inspire acts of conservation. Acts that will save, not just the great iconic species of Africa, but wildlife across our fabulously, diverse planet. **Minnesota would like to thank Brian Jarvi for this 100% donation!**
